

PETER JOHN GERERO
FULL STACK LARAVEL DEVELOPER

Taguig, Metro Manila | +639957284706 | peterjohnngerero@gmail.com | github.com/Pedrokels | peterjohnngerero.vercel.app

PROFESSIONAL SUMMARY

Full Stack Developer with over 4 years of professional experience designing, developing, and maintaining enterprise web applications for the Philippine government. Experienced in building scalable full-stack applications using Laravel, Livewire, PHP, JavaScript, MySQL, and Python, with additional experience in REST API development, machine learning integration, data visualization, and system automation.

Throughout my career, I have worked on multiple government information systems supporting researchers, nutrition experts, and administrative personnel. I enjoy solving complex technical problems, building efficient software solutions, and continuously learning modern technologies.

Currently seeking a remote Software Engineer, Backend Developer, or Full Stack Laravel Developer position where I can contribute to building reliable and scalable applications.

EDUCATION

SORSOGON STATE COLLEGE - BULAN CAMPUS

Bachelor of Science in Information Technology

2016 - 2019

WORK EXPERIENCE

DOST – FOOD AND NUTRITION RESEARCH INSTITUTE (DOST-FNRI)

Project Technical Specialist II (Latest Position)

February 2022 – June 2026

Previously promoted from Project Technical Assistant IV, Project Technical Assistant III, and Project Technical Assistant I

Full Stack Software Development

- Designed, developed, and maintained multiple web applications using Laravel, Livewire, PHP, JavaScript, Bootstrap, Tailwind CSS, and MySQL.
- Built responsive user interfaces and backend modules for government information systems.
- Developed reusable system components to improve maintainability and long-term scalability.
- Optimized existing applications through bug fixes, database improvements, and performance enhancements.

API Development

- Designed and implemented RESTful APIs for communication between multiple web and mobile systems.
- Integrated data from Anthropometric, Biochemical, and Dietary systems into centralized applications.
- Developed secure endpoints for data validation and synchronization.

Machine Learning & AI

- Cleaned and prepared datasets using Pandas and NumPy.
- Trained multiple machine learning models using Scikit-learn and XGBoost.
- Evaluated model performance using various classification metrics.
- Developed Flask and FastAPI APIs to deploy trained machine learning models for integration with web and mobile applications.
- Contributed to AI initiatives involving local language processing and predictive analytics.

Data Visualization

- Developed dashboards and interactive visualizations to assist researchers and stakeholders in interpreting project data.

Database Development

- Designed relational database structures.
- Developed optimized SQL queries.
- Improved database performance and ensured data integrity.

Collaboration

- Worked closely with statisticians, nutrition researchers, project managers, and technical teams to deliver software solutions aligned with organizational objectives.
- Participated in project planning, testing, deployment, maintenance, and user support.

Additional Responsibilities

- Provided technical support for hardware, software, and networking issues when required.
- Produced and edited promotional, training, and event videos for official institutional activities.
- Conducted photography and photo editing for food products, research documentation, and organizational events.
- Assisted in multimedia production and coordinated technical operations during conferences, trainings, and official events.

PROVINCIAL HUMAN RESOURCE MANAGEMENT OFFICE

Technical Support

January 2019 – March 2019

- Developed a Computerized Payroll System using Python.
- Maintained office computers, printers, and network devices.
- Assisted in troubleshooting software and hardware issues.

SUTHERLAND GLOBAL SERVICES

Sales Associate

December 2019 – June 2020

- Delivered customer support through voice communication.
- Assisted customers with product inquiries and order processing.
- Maintained excellent customer satisfaction while meeting sales targets.

PROJECTS

PALIGID MAPPING SYSTEM (CONTRIBUTED DURING DEVELOPMENT)

Laravel, Livewire, PHP, MySQL, Mapbox GL JS, deck.gl, GIS, JavaScript, PostGIS

- Developed core features of the PALIGID Mapping System, a web-based GIS and analytics dashboard for visualizing the Philippine food supply chain across the Philippines.
- Built interactive geospatial visualizations using Mapbox GL JS and deck.gl, integrated spatial data using PostGIS, and developed backend modules with Laravel to support map layers, regional analytics, and food system indicators.
- Designed responsive dashboard components for displaying geospatial insights, data visualizations, and supply chain analytics.
- The project was still under active development at the end of my employment.

DATA VALIDATION SYSTEM

PHP, Laravel, Livewire, JavaScript, Bootstrap, MySQL

- Developed a data validation platform for researchers that automated validation processes and integrated multiple nutrition information systems through REST APIs.

E-NUTRITION DATA ANALYTICS

Python, Scikit-learn, Flask, FastAPI

- Developed an end-to-end machine learning solution by cleaning datasets, training multiple classification models, evaluating model performance, and deploying prediction APIs for integration into web applications.

IT HELP DESK & SUPPORT PORTAL

Laravel, Livewire, MySQL

- Designed an internal ticket management system to streamline technical support requests, issue tracking, and scheduling.

ELECTRONIC DATA COLLECTION SYSTEM FOR BIOCHEMISTRY

PHP, Laravel, Livewire, JavaScript, Tailwind, MySQL

- Developed a crucial module for the Electronic Data Collection System, focused on streamlining Authentication and Data Consolidation processes for biochemistry-related data.
- This system integrates data from the Anthropometry (Anthrop) collection system and consolidates it into the Biochemistry system for further analysis and reporting.

BARANGAY E-SERVICES AND ID SYSTEM

PHP, Laravel, Livewire, JavaScript, Bootstrap, MySQL

- Developed a full-stack web application for managing resident records, official records, blotters, and complaints, featuring dynamic certificate and clearance generation, along with integrated digital ID issuance with camera capture and e-signature support.

COMPUTERIZED PAYROLL SYSTEM

Python, SQLite, PyQt5 Designer

- Developed a full-stack desktop application using Python for implementing a Computerized Payroll System.

ADDITIONAL

Technical Skills

Languages: PHP, Python, JavaScript, HTML, CSS

Backend Development: Laravel, Laravel Livewire, RESTful APIs, FastAPI, Flask

Frontend Development: Livewire, AlpineJS, VueJS, Bootstrap, Tailwind CSS

Databases: MySQL, SQLite

Machine Learning: Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn

Tools: GIT, Github, Postman, VS Code, Google Cloud, Jupyter Notebook, PyCharm

GIS & Mapping: Mapbox GL JS, deck.gl, GIS, GeoJSON, Spatial Data Visualization, PostGIS
